WORKING FROM HOME

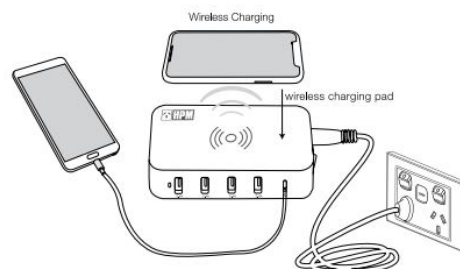

PRODUCT HIGHLIGHT HPM - USB & WIRELESS CHARGING HUB

New from HPM - USB & Wireless Charging Hub allows up to 6 devices to be charge simultaneously. Automatically detects power required to charge each device, even when all parts are in use.

Stay protected with over current, short circuit and over temperature protection.

Wireless charger pad works with Qi-enabled devices
1.5m power cable lets you keep the charging hub and your mobile device easily accessible.

NOW IS THE TIME TO GO LED FOR ALL YOUR LIGHTING

HALOGEN GLOBE PHASE-OUT

The Lighting Council of Australia has advised that it has been agreed to phase-out many halogen globes in Australia to commence on **1 September 2021**. This regulatory change will effectively restrict the supply and sale of many halogen globes on and after 1 September 2021.

Upcoming summer heat and your halogen globes issues.

Are you aware that halogen globes create an excess amount of heat? With the onset of summer your existing halogen globes will not only bring your room temperature up but they also limit their life span by continually overheating the lamp holder that the globe is either plugged or screwed into.

Tinned copper is the usual contact material used for all lamp holders and the consistent heating and cooling of this material is detrimental to continue to allow power to pass through it and as such its insufficiency's to allow power to flow creates heat which is the greatest detriment to light globes.

We at MAES highly recommend when changing from halogen or incandescent lighting to LED lighting that if you are retro fitting LED globes into existing fittings that you change not only the globe and transformer but you also change the existing lamp holder hence guaranteeing maximum life span expected of the new LED globe.

DYNALITE

During COVID-19 when we had some free time we sent two of our **senior staff Aaron and Ben** for some upskilling on Dynalite which is complete control solution for light and power.

If you are interested in what Dynalite might help in your home or office search on the link below.

A MESSAGE TO OUR C'BUS CLIENTS

Do you have First Generation C'Bus?

Are you having problems changing your lights to LED?

Over the last 2 years with the introduction of LED lighting, a lot of our existing C'Bus clients have been having all sorts of problems upgrading to LED lighting.

Our experience with C'Bus has allowed us to tailor individual clients with solutions to change your existing lighting to LED.

Your opinion Matters

Do you read online reviews? We do, and so do other customers. That's why we'd love it if you take a few moments to review your experience.
