ASTLEY ELECTRICAL

New Name and Branding

I am proud to announce that both my Sons Aaron and Ben Astley are now Directors and leading the company to the future.

After 15 years as Miles Astley Electrical Services (MAES) it has finally come the time to change the name to ASTLEY ELECTRICAL as both of my Sons Aaron and Ben Astley have become Directors.

We are now known as ASTLEY ELECTRICAL, even though the logo and branding has changed we still provide the same great service and family owned.

We are excited for the evolution and new chapter in the ASTLEY journey.

LEVEL 2 ELECTRICIAN

Astley Electrical can now provide Level 2 electrical works where we can help you with Ausgrid defect rectification, consumer mains cabling, replacement of private power poles and meter board upgrades for new metering and solar systems.

Trevor Davern Electrical has now teamed up with Astley Electrical to provide assistance with all Level 2 works.

SAL PIXIE TRAINING

Aaron and Ben recently attended a SAL Pixie Training to become certified installers of the PIXIE products.

PIXIE is a wireless technology to transfer your home into a smart home without extract wiring.

Wireless control that everyone can use.

PIXIE uses Bluetooth Mesh to connect all your products to 'talk' to each other without extra wiring. Connect lights, blinds, garage doors, fans and appliances.

Existing Homes - swap your existing switches to PIXIE smart dimmers, switches and timers to transform your home into a smart home.

New Homes - No special wiring required to install PIXIE. An electrician installs PIXIE devices into your preferred wall plate to make your home smart.

Create schedules, timers, scenes and more to customise your smart home.

To download a brochure and for more information go to the PIXIE website: <https://pixieplus.com.au/>

PIXIE PLUS TECHNICAL OVERVIEW

Connected Smart Homes, Apartments, Hotel Rooms

All PIXIE Master and Secondary devices communicate in-home between themselves using secure Bluetooth Mesh and delivers PIXIE PLUS App control via Bluetooth connection.

Maximum range of 32-42 PIXIE Master devices per PIXIE Home (network). PIXIE Secondary devices don't add to this total. To control more Master devices add one PIXIE Gateway for every 32-42 devices. (Depends on layout and construction of home)

PIXIE PLUS App communicates to devices in-home using Bluetooth or WiFi (needs PIXIE Gateway) for direct control. PIXIE PLUS App chooses strongest signal - if WiFi in use - to ensure optimal response when in home.

Out-of-home control from anywhere in the world for users authorised for out-of-home control through detailed security provisioning in the PIXIE PLUS App.

PIXIE Gateway connects to in-home WiFi and acts as a bridge between the internet, PIXIE Cloud and the PIXIE device's Bluetooth mesh in home.

1 physical home can have multiple virtual PIXIE Homes by installing additional PIXIE Gateways. Virtual PIXIE Homes allow division by floors, wings etc. when maximum Master device limit reached. Add as many PIXIE Gateways as needed.

PIXIE Cloud, hosted in Australia, is used for PIXIE PLUS App, accounts, user authorisation, linking the PIXIE PLUS ACCOUNT to voice assistant's clouds from other vendors.
