PRODUCT HIGHLIGHT

LEGRAND INTERCONNECTABLE RADIO FREQUENCY WIRELESS SMOKE ALARMS

Legrand Photoelectric smoke alarms interconnectable and radio frequency wireless smoke alarms enhance a level of fire safety to your home when one alarm sounds, all interconnected alarms sound simultaneously.

- Wired or Wireless interconnectable
- Flush or surface mount
- Radio Frequency utilise a radio transmitter, which eliminates need to run interconnect wires between multiple floors and rooms, allowing for a flexible and more cost-effective installation

By leveraging RF technology, these alarms offer a convenient and cost-effective way to ensure comprehensive coverage and prompt warning in the event of a fire, thereby significantly increasing the safety and protection of occupants.

Lithium Batteries & Danger of Charging Indoors

As we are all aware with the media notifying us every other day concerning the fires that are happening with people charging their scooters, bikes and associated battery devices, it is now time to move those devices to areas that are free of combustible material to minimise the risk if your battery device decides to self combust during charging. The simple answer is to charge these devices either outside or on a concrete floor clear of anything else.

Did you also realise, mobile phones and laptops, iPads are also causing house fires. Please charge these devices in an open area and not surrounded by pillows or blankets.

ZETR POWER POINT

If you are wanting a power point that is architecturally pleasing and has a clean line, then Zetr is the way to go. It sits flush with the wall finish and is auto switching meaning no visible switches and turns on supply once you plug in your appliance. Comes in beautiful finishes to suit your application.

You can also get them with USB charge points.

www.zetr.com.au

Car Charges Multi Residential Properties

This is aimed primarily on unit owners where garages and common area power is shared by house power and is metered and paid for by all unit owners.

Be aware that charging a car uses a lot of power and as more and more people are purchasing electric cars, it is becoming an issue with common area house power and not fair on unit owners that don't have electric cars.

If common area house power usage goes up dramatically, it might be worth enquiring if someone has just purchased an electric car. If that is the case, then the only real

solution is to have individual unit meter power connected to each garage where cars are being charged.

Client Reviews

Astley Electrical have a new operating system in which we send out an email for client reviews after the job has been completed.

Your feedback is valuable to us for any improvements that are required and to know if clients are happy with the service we provide.

Thank you for those that have already sent through feedback.

Google Reviews are greatly appreciated if you could click on the link within the email that will be sent to you.

OUR TEAM

Miles Astley: Managing Director, Special Class Electrician with over 40 years experience in the electrical, communication and audio/visual industry.

Aaron Astley: Director, Electrician Supervisor - C'Bus specialist, Certificate III Telecommunication, Dynalite Accredited

Ben Astley: Director, Electrician Supervisor, Certificate III Telecommunication, Dynalite Accredited

Nathan Wall: Licensed Tradesman

Ryan Brophy: 2nd Year Apprentice

Ben Kelly: 1st Year Apprentice

Arlen Kalloghlain: 1st Year Apprentice

Jacki Astley:
Office Manager

Sarah Parker:
Administration

YOUR OPINION MATTERS

Do you read online reviews? We do, and so do other customers. That's why we'd love it if you take a few moments to review your experience.
